

Atlas Living

building your vision

Hyde Park, W2

Brief

Atlas living took all the home improvement stresses away from one of our increasing number of clients based abroad. We redecorated this 4-bedroom central London house to bring it back to pristine condition. The client received regular emails and updates on the progress of works, and all important decisions were made with the client's consent.

Summary

After years on the rental market the property was in desperate need of a refurbishment. The basic restoration included weatherproofing of the existing flat roof, installation of a new combi boiler, repainting all the walls, retiling the bathroom, laying new carpeting throughout, as well as general repair work and organising professional cleaning of the house.

Details

Some interior design was needed for this project, including choosing the paint and carpet colours, as well as lighting throughout. Our fully qualified electrician brought the electrics back up to modern standards, installed new down-lights in each room and issued a certificate of safety upon completion.
