

Atlas Living

building your vision

Kensington, W8

Brief

Our client approached us to modernise and maximise the existing space in his 3-bedroom flat in the heart of Kensington with the intention of creating a luxurious space for future rental purposes. Before starting works on this project, Atlas Living redesigned the property's layout to fit the client's brief and stripped out the entire property, including all existing furniture, carpets and floor coverings.

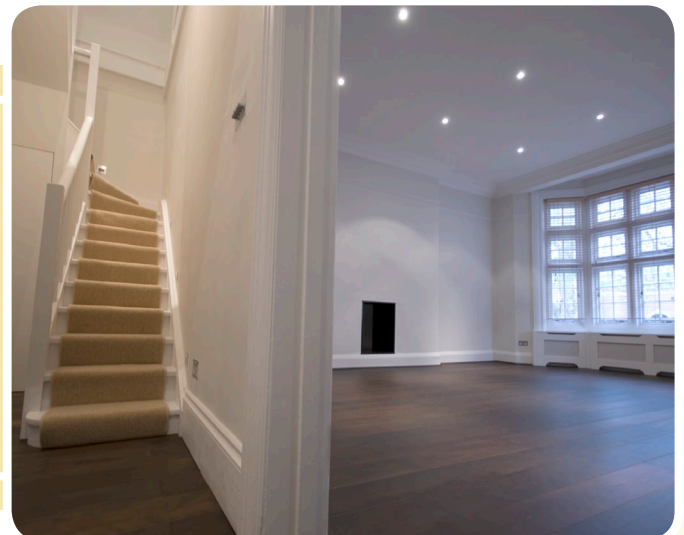

Summary

We relocated the existing boiler to create storage space, installing a new fuseboard and wirings, and a wall was knocked through from the existing en-suite to the existing bathroom to create a new and larger en-suite. The hallway was opened up by removing walls and installing structural steels, and we were able to incorporate a new hallway bathroom through the creation of this space. We laid new carpets and built new fitted push-release wardrobes in the bedrooms and installed new sanitaryware and tiling in the new bathrooms.

Details

We transformed the existing living room into a grand and opulent space with dark wooden flooring, recessed lighting, as well as a new fireplace opening with granite surround. A new kitchen was designed and installed, featuring a unique recirculating extractor-fan and to finish off, the whole flat was redecorated, including painting all walls and fitting new cornicing to match the original.
