

Notting Hill, W2

A 2-bedroom flat in Notting Hill needed a full modern refurbishment throughout. Our client wanted to maximise the space in the bathroom and kitchen. The project involved everything from designing a new kitchen to fitting natural wood flooring all the way through the kitchen, hallway and sitting room, taking all the hassle and stress away from the client.

The project lasted 7 weeks, and in that time, we repainted the entire property, removed and replaced all the door and window ironmongery to the highest standard. We organised the removal of all unwanted furniture and a professional cleaning service to make sure the flat was looking spotless before the client moved back in.

Designed and built recessed shelving in the master bedroom, and our team of skillful builders also created bespoke floating headboards. The existing bricked-up fireplace was dug out, and a granite surround and hearth was installed.
